Dear Mr. Hebertson:

Enclosed are the 33 well permit applications that you had recently returned to us per our request. As you know, these were filed originally in December, and after further discussions with management, we would like to have these enter the approval process at this time.

The permits are for the wells listed below:

Telonis 21-90	Fausett 16-144	Utah 32-158
Marsing 25-134	Telonis 16-145	Utah 32-159
Utah 36-135	Parr 16-146	Utah 32-160
Utah 36-136	Christiansen 17-147	Utah 32-161
Utah 36-137	Christiansen 17-148	Utah 32-162
Utah 02-138	Birkinshaw 18-149	Utah 36-163
Utah 02-139	Telonis 20-152	Utah 36-164
Utah 02-140	Telonis 20-153	Utah 36-165
Utah 02-141	Telonis 24-154	Utah 02-166
Telonis 15-142	Telonis 29-155	Utah 02-167
Fausett 16-143	Telonis 30-157	Utah 02-168

You will notice that wells 25-134, 36-164, 36-165, and 02-166, are all located outside of 400' "window" required for their townships. Due to topographical constraints, we ask that an exception to location be granted.

Cultural surveys have been conducted for the "Utah" well sites, and should be on file at your agency.

Also, please accept this letter as our request that all information regarding these permits be kept confidential, if said information is eligible for such consideration. This request is made in accordance with State of Utah Oil & Gas rule # R649-2-11.

Thank you for your assistance. Please feel free to call if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Terry D. Burns".

RE: Proposed RGC/Telonis ¹⁹19-154 Coalbed Methane Gas Well
SE/SW, Section ¹⁹29, T14S, R9E, SLM, Carbon County, Utah

Dear Mr. Sampinos:

River Gas Corporation ("RGC") has filed an Application for Permit to Drill ("APD") with the Division of Oil, Gas, and Mining ("DOGM"). An on-site inspection for this proposed well has been scheduled with the staff of the DOGM for April 9, 1996 beginning at 10:00 AM. Several on-sites are scheduled for this date. We will begin the on-sites at the location of the E.G. Telonis #1 well.

We provided the DOGM with a copy of the Memorandum of Surface Land Use Agreement that pertains to the development of this proposed well. DOGM required that prior to scheduling the on-site. Their regulations require that an operator provide them with evidence of surface owner consent for construction of a well site and its facilities. Also, as part of DOGM's permitting regulations, the surface owner has to be notified of any on-site inspection. This gives the surface owner the opportunity to attend the on-site or submit written comments to the DOGM during the APD review process. By attending, the surface owner can confirm that the manner in which operations are proposed is in compliance with the land use agreement for the site.

After being provided with notice of the on-site, you are not required to be present in order for the on-site to be done. If you do not attend the on-site, it will be assumed that you did not want to participate. If you have any questions on this scheduled on-site, please call me at our office in Price at (801)637-8876. You may also call the DOGM in Salt Lake City, Utah at (801)538-5340.

Sincerely,

Steven L. Prince
Regulatory Manager

1. EXISTING ROADS

- A. See Exhibit "E". We do not plan to change, alter or improve upon any existing state or county roads. Existing roads will be maintained in same or better condition.
- B. From intersection Hwy. 6 and Westwood Blvd. in Price, travel westerly & northerly on Westwood Blvd. 1.3 mile to Gordon Creek Rd., then left & westerly on Gordon Creek Rd. 0.45 mile to gravel County road on left, then westerly on County road 6.0 miles to dirt road on left, then southerly on dirt road 2.4 miles to proposed access to #36-165, continue southwest and south approximately 2 miles, then west and north approximately 1 mile to railroad crossing, continue west .6 mile, then north on access to #02-167 .9 mile, then east to #02-167 location. Continue easterly ±1600' to proposed location.

2. PLANNED ACCESS

See Exhibit "E". ±1600' new access will be required.

- A. Maximum Width: 14' travel surface with 27' base
- B. Maximum grade: 3%
- C. Turnouts: No
- D. Drainage design: Natural drainage will be retained. Water will be diverted around well pad as necessary.
- E. Cuts and fills: None
- F. Surfacing materials: 4" sand and gravel if necessary.
- G. Gates, cattleguards, fence cuts: One gate or cattleguard.

If well is productive, road will be surfaced and maintained as necessary to prevent soil erosion and accommodate year-round traffic.

3. LOCATION OF EXISTING WELLS

- A. See Exhibit "E". There are no existing wells within one mile of the proposed location.

4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES

- A. If the well is a producer, installation of production facilities will be as shown on EXHIBIT "H". Buried powerlines run along access on the east or north, gathering lines on the south or west.
- B. Rehabilitation of all pad areas not used for production facilities will be made in accordance with landowner stipulations.

5. LOCATION AND TYPE OF WATER SUPPLY

- A. Water to be used for drilling will be purchased from the Price River Water Improvement District (tel. 801-637-6350). This has been arranged by Mr. Michael J. Farrens, Vice President of River Gas Corp. - Utah Operations. He has been in contact with Mr. Phillip Palmer. Mr. Farrens has discussed this arrangement with Mark Page of the Division of Water Rights (tel. 801-637-1303) over the telephone. The Division of Water Rights is to furnish the Oil & Gas Division with a letter of approval concerning this matter.
- B. Water will be transported by truck over approved access roads.
- C. No water well is to be drilled for this location.

6. SOURCE OF CONSTRUCTION MATERIALS

- A. Any construction materials needed will be obtained locally and hauled to the location on existing roads.
- B. No construction or surfacing materials will be taken from Federal/Indian land.

7. METHODS FOR HANDLING WASTE DISPOSAL

- A. As the well will be air drilled, a small reserve pit will be constructed with a minimum of one-half the total depth below the original ground surface on the lowest point within the pit. The pit will not be lined unless

conditions encountered during construction warrant it. Three sides of the reserve pit will be fenced within 24 hours after completion of construction and the fourth side within 24 hours after drilling operations cease with four strands of barbed wire, or woven wire topped with barbed wire to a height of not less than four feet. The fence will be kept in good repair while the pit is drying.

- B. Following drilling, the liquid waste will be evaporated from the pit and the pit backfilled and returned to natural grade.

No liquid hydrocarbons will be discharged to the reserve pit or location.

- C. In the event fluids are produced, any oil will be retained in tankage until sold and any water produced will be retained until its quality can be determined. The quality and quantity of the water will determine the method of disposal.
- D. Trash will be contained in a portable metal container and will be hauled from location periodically and disposed of at an approved disposal site. Chemical toilets will be placed on location and sewage will be disposed of at an appropriate disposal site.

8. ANCILLARY FACILITIES

- A. We anticipate no need for ancillary facilities with the exception of three trailers to be located on the drill site.

9. WELLSITE LAYOUT

- A. Available topsoil will be removed from the location and stockpiled. If ground frost prevents the segregation and removal of the topsoil material from the less desirable subsoil material, cross-ripping to the depth of the topsoil material may be necessary. Location of mud tanks, reserve and burn pits, and soil stockpiles will be located as shown on the attachments.
- B. A blooie pit will be located 150' diagonally from the drill hole. A line will be placed on the surface from the center hole to the burn pit. Burn pit will not be lined, but will be fenced on four sides to protect livestock/wildlife.
- C. Access to the well pad will be as shown on Exhibit "G".

- D. Natural runoff will be diverted around the well pad.

10. PLANS FOR RESTORATION OF SURFACE

- A. All surface areas not required for producing operations will be graded to as near original condition as possible and contoured to maintain possible erosion to a minimum.
- B. Available topsoil will be stockpiled and will be evenly distributed over the disturbed areas and the area will be reseeded as prescribed by the landowner.
- C. Pits and any other area that would present a hazard to wildlife or livestock will be fenced off when the rig is released and removed.
- D. Any oil accumulation on the pit will be removed or overhead flagged as dictated by then existing conditions.
- E. Date of commencement will be September, 1996. Rehabilitation will commence following completion of the well. Rat and mouse holes will be filled immediately upon release of the drilling rig from the location. If the wellsite is to be abandoned, all disturbed areas will be recontoured to the natural contour as is possible.

11. SURFACE OWNERSHIP

- A. The wellsite and access road will be constructed on lands owned by SITLA, #3 Triad Center, Ste. 400, Salt Lake City, UT 84180-1204. The operator shall contact the landowner and the Division of Oil, Gas & Mining 48 hours prior to beginning construction activities.

12. OTHER INFORMATION

The primary surface use is grazing. The nearest dwelling is in Price, 15.7 miles east-southeast of location. Nearest live water is Gordon Creek.

If there is snow on the ground when construction begins, it will be removed before the soil is disturbed, and piled downhill from the topsoil stockpile location.

The backslope will be constructed no steeper than 4:1, the foreslope no steeper than 4:1.

All equipment and vehicles will be confined to the access road and well pad.

A complete copy of the approved Application for Permit to

Drill (APD) including conditions and stipulations, shall be on the wellsite during construction and drilling operations.

There will be no deviation from the proposed drilling and/or workover program without prior approval from the Division of Oil, Gas & Mining.

REGIONAL/LOCAL SETTING & TOPOGRAPHY

The proposed location lies on the eastern edge of the Wasatch Plateau on the first topographic shelf below the high set of cliffs but above the Mancos lowlands. The location lies on a flat ridge top. There is a minor drainage on the south side of the location. This drainage begins on the location rather than crossing it.

SURFACE USE PLAN

CURRENT SURFACE USE: The area is currently used for domestic grazing and wildlife habitat.

PROPOSED SURFACE DISTURBANCE: A rectangularly shaped pad will be constructed with approximate dimensions of 215' X 175'. A 65' X 65' reserve pit will be constructed on the edge of the pad. Approximately .25 mile of new road will be constructed from the 2-167 location.

LOCATION OF EXISTING WELLS WITHIN A 1 MILE RADIUS: There are no known wells within a 1 mile radius.

LOCATION OF PRODUCTION FACILITIES AND PIPELINES: There are no production facilities at present. The best route for a production pipeline has not been determined at this time.

SOURCE OF CONSTRUCTION MATERIAL: Onsite materials will be used for most of the needed construction.

ANCILLARY FACILITIES: None will be needed.

WASTE MANAGEMENT PLAN:

Drilling fluids will be evaporated and the pit backfilled.
Trash will be contained on location and hauled off.
Chemical toilets will be used on location and all waste will be hauled to an approved site.

ENVIRONMENTAL PARAMETERS

AFFECTED FLOODPLAINS AND/OR WETLANDS:None

FLORA/FAUNA: Pinion, Juniper, Sage, prickly pear, scattered grasses/Deer, Elk, birds, rodents

SOIL TYPE AND CHARACTERISTICS: Sandy clay with scattered rock fragments.

SURFACE FORMATION & CHARACTERISTICS: Mancos Shale and Mancos derived alluvium.

EROSION/SEDIMENTATION/STABILITY: No active erosion or sedimentation at present. Location should be stable.

PALEONTOLOGICAL POTENTIAL: None observed.

RESERVE PIT

CHARACTERISTICS: A rectangular reserve pit will be constructed with dimensions of 65' X 65' X 6'.

LINER REQUIREMENTS (Site Ranking Form attached): None Required.

SURFACE RESTORATION/RECLAMATION PLAN

Upon abandonment the site will be reclaimed as per SITLA instructions.

SURFACE AGREEMENT: Steve Prince stated that River Gas has a surface agreement with SITLA.

CULTURAL RESOURCES/ARCHAEOLOGY: Surveyed by Powers Elevation Co.

OTHER OBSERVATIONS/COMMENTS

Bill Bates with DWR actually said that this was a good location.

Surface:

An onsite evaluation was done for the proposed well on 11/5/96. Representatives from DOGM, DWR and River Gas were present. SITLA was notified but chose not to attend. The reserve pit ranking for this location is 13. Which places it as a Level III sensitivity no pit liner will be required. DWR requested that River Gas avoid drilling operations during certain times of the year. River Gas agreed to DWR's request. It is recommended that this application be approved.

As mentioned in our conversation, the APD's for the wells listed below are set to expire soon. RGC currently plans to drill these wells in 1998. Therefore, we respectfully request an extension of the APD until December 1, 1998.

The wells are:

Although the Division has no rule stipulating the length of an APD extension period, it is the current practice of the Division not to grant an extension for longer than the original 12 month approval [Rule R649-3-4(4) of The Oil and Gas Conservation General Rules]. At such time the existing APD approval will expire and the operator must submit a new APD for consideration by the Division.

Re: River Gas/Phillips Merger

Dear Mr. Thompson:

As you may know, River Gas Corporation ("RGC") merged into Phillips Petroleum Company ("Phillips") effective December 31, 2000 at 11:59 p.m. I have enclosed a Certificate of Articles of Merger issued by the Utah Department of Commerce and, although duplicative, a sundry notice formally evidencing the merger for your records, and a list of all wells, including injection wells, formerly operated by RGC.

Please change the Division's records to reflect the change in operator of these wells from RGC to Phillips. All operational questions should be directed to Phillips at the following address:

Phillips Petroleum Company
Attn: Billy Stacy, Operations Manager
P.O. Box 3368
Englewood, CO 80155-3368
Telephone No.: (720) 344-4984

Phillips currently has a bond on file with the Division (a copy of which is enclosed for your reference), but I understand an \$80,000 Letter of Credit is in the process of being substituted.

Mr. Jim Thompson

On behalf of Phillips, I thank you for your cooperation. Should you have any further questions or concerns, please do not hesitate to contact me.

Yours very truly,

Merger Recognized

Acceptable evidence has been filed in this office concerning the merger of River Gas Corporation into Phillips Petroleum Company with Phillips Petroleum Company being the surviving entity.

The oil and gas lease files and rights-of-way files identified on the enclosed exhibit have been noted as to the merger. The exhibit is the list supplied by the representative of the companies, and verified by our computerized records. We have not adjudicated the case files to determine if the entity affected by the merger holds an interest in the leases identified, nor have we attempted to identify leases where the entity is the operator on the ground, maintaining no vested record title or operating rights interest. We are notifying the Minerals Management Service and all applicable BLM offices of the merger by a copy of this notice. If additional documentation for a change of operator is required by our Field Offices, you will be contacted by them.

By recognition of the merger the obligor is automatically changed by operation of law from River Gas Corporation to Phillips Petroleum Company on Letter of Credit No. P-207337 (BLM Bond No. UT0829). A rider to BLM Bond No. ES0048 assuming any and all liabilities of BLM Bond No. UT0829 must be submitted for approval to the Eastern States Office, Attn: Bill Forbes, 7450 Boston Boulevard, Springfield, VA 22153. After the rider is approved, the Letter of Credit will be returned to the financial institution that issued it.

Merger/Name Change Recognized

Acceptable evidence was received in this office on January 14, 2003, concerning the change of name of Phillips Petroleum Company to **ConocoPhillips Company** and the merger of **Conoco Incorporated** into **ConocoPhillips Company** on Federal oil and gas leases, with **ConocoPhillips Company** being the surviving entity.

The Secretary of the State of Delaware certified the effective date of this merger effective December 31, 2002.

The oil and gas lease files identified on the enclosed exhibit have been noted to the merger. The exhibit was compiled from a list of leases obtained from your list of leases. Eastern States has not abstracted the lease files to determine if the entities affected by this merger hold an interest in the leases identified nor have we attempted to identify leases where the entities are the operator on the ground maintaining no vested record title or operating rights interest. We are notifying the Minerals Management Service and all applicable Bureau of Land Management offices of this merger and name change by a copy of this notice. If additional documentation for changes of operator are required by our Field Offices, you will be contacted by them.

If you identify other leases in which the merging entity maintain an interest, please contact this office and we will appropriately document those files with a copy of this Notice.

By Operation of law the name of the principal on Nationwide Oil and Gas Bond held by Conoco Incorporated (ES0085) has been changed to ConocoPhillips Company.

If you have any questions, please contact Bill Forbes at 703-440-1536.
